

Parker

Design – Fredrik Färg & Emma Blanche

JOHANSON

Introduction

Parker is an oval-shaped stool with a metal ring that creates the impression of a waist being cinched in.

Emma Blanch says: “We chose to use metal to make the stool and the distinctive ring, because Johanson is extremely flexible when it comes to colours – creating the ideal conditions for designers to develop styles that fit into different environments.

Designer

Stockholm based design studio Färg & Blanche is known for their experimental stance, where each expression informs the other, they effortlessly move between the exclusive hand made one off and the industrially produced, without ever losing their distinctive touch. We are proud to present a new collaboration, Norma – a series with a strong identity.

Model

Material

Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

Multicolour - Finish RAL

Take part in Johanson's color range, 400 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 192 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL colors with pearl finish and chrome are offered.

For all colours see www.johansondesign.com

- 192 Solid collection (gloss 72)
- 192 Structure collection (matte, textured surface)
- 15 Pearl finish collection and chrome.

Facts

Measurements cm

Parker

Fabric requirement (r.m)	0,85
Leather requirement (m ²)	1,8
Leather requirement (m ²)	5,6
Volume (m ³)	0,064

Facts

Material

- The frame consists of wood and CMHR foam (density 65kg) that meets the highest requirements for flammability (CMHR quality). The base is made of finished/lacquered steel.

Certificate

- Fire certificate (Danak)

BIM - objects can be downloaded at

johansondesign.com

Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.

Material declaration
