

Touchwood

Fact Sheet

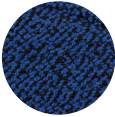

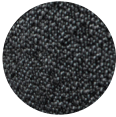

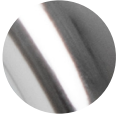

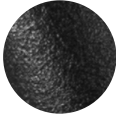

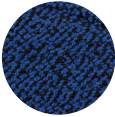

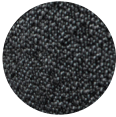

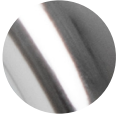

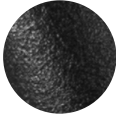

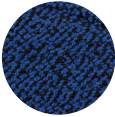

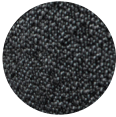

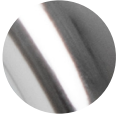

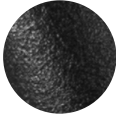

Touchwood Chair

Design by Lars Beller Fjetland

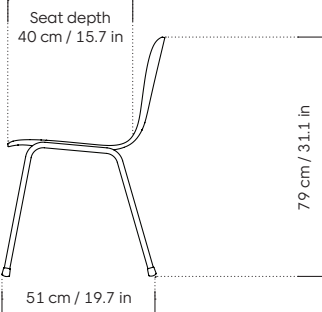

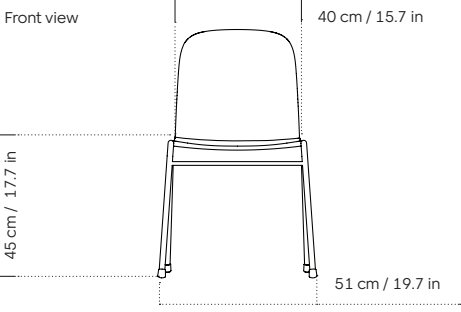

Subtle, strong, and elemental, the Touchwood Chair reflects designer Lars Beller Fjetland's belief that interacting with natural materials is of huge importance. Neither unnecessary decorations nor extraneous components should interrupt the simple relationship between material and user. The beechwood is molded into a continuous shape, making it contract grade durable, while preserving its flexibility. All variants of the Touchwood family stack, making them an ideal choice for public spaces or busy homes. If you perceive more than a little influence from classic minimalistic Scandinavian design at play in this hardworking, functional chair, you'd be right! An armchair, counter stool, bar stool and bar chair in a variety of wooden and metal bases, heights and finishes complete the Touchwood Family.
